While we do not host the parties, we provide beautiful setups and everything you need to run a spa party, complete with clear step-by-step instructions that are easy to follow. This ensures a fun and independent experience for everyone. Hosts can be parents, friends, family, babysitters, high schoolers, or any adult ready to enjoy the spa party with the kids!

We deliver, set up, and pick up the spa party, so there's less work for you! Plus, this method allows everyone to take their time—many customers choose to pause during the spa party to eat and then come back. There's no rush; it's your home, your time, and your spa party!

We also prioritize cleanliness and safety by keeping our spa products and experience super clean and non-toxic. The instructions will include a complete list of all products and information about them. Just remember to have one host for every six children!
